

## **CLINE MINING CORPORATION ANNOUNCES EXPLORATION PLANS FOR LOSSAN PROJECT**

Sudbury, November 30, 2004 - Cline Mining Corporation (CMK-TSX:V) is pleased to announce that the BC Government has approved an exploration program which Cline has submitted in order to confirm and enhance data from historic sources and further define the coal quality on the Lossan Coal property.

Cline Mining will complete a 20-hole drill program and a bulk-sampling program to provide new data which will support a feasibility study of the property.

Cline Mining proposes to evaluate Lossan initially as a producer of PCI and subsequently as a coking coal producer—both used in steel making. The Company intends to fast track this project based on a measured resource of 2.279 million tonnes, an indicated resource of 3.656 million tonnes and an inferred resource of 14.157 million tonnes coal.

The Lossan Area covers coal-bearing Gething Formation strata in the Rocky Mountain foothills of northeastern British Columbia. The Lossan Coal Property is located approximately 15 kilometres south of the Willow Creek Coal Mine currently a source of PCI and coking coal products.

Cline Mining is a coal mine development company focused on the exploration and development of coking coal assets in British Columbia. The Company website is [www.clinemining.com](http://www.clinemining.com). Shares of the company trade on the TSX-Venture under the symbol CMK.

Additional information is available on the Company's website at [www.clinemining.com](http://www.clinemining.com)
